

Figure 2 Multidetector computed tomography findings. (A and B) Coronal sections. The fossa ovalis is in contact with the accessory chamber. (C and D) Three-dimensional reconstruction. All pulmonary veins flow into the accessory chamber. LAA, left atrial appendage; LV, left ventricle; FO, fossa ovalis; AC, accessory chamber; MC, main chamber; RIPV, right inferior pulmonary vein; LSPV, left superior pulmonary vein. Arrow heads, membrane.
